WELCOME MESSAGE

Dear Fellow Academic Members!

On behalf of the Society of Gastrointestinal Intervention (SGI), it is a great honor and pleasure to invite you to "The 18th Annual meeting of Society of Gastrointestinal Intervention (SGI 2025)" which will be held in Seoul, Korea on October 28 and 29, 2025.

Our society is a unique multidisciplinary society founded to encourage and facilitate the clinical and scientific collaborations between radiologists, surgeons and gastroenterologists. The goal of our society is to build a comprehensive GI intervention network among endoscopists, interventional radiologists and gastrointestinal surgeons. We hope this network provides a platform where experts can share technological innovations of each specialty. The society also aims to support brilliant young doctors in the early stages of their career and guide their way onto the global stage. Finally, and foremost, our mission is to set an example showcasing the benefits of multidisciplinary collaboration in clinical practice. To achieve these goals, we hold an International Academic Conference once a year and publish quarterly an academic journal titled the 'International Journal of Gastrointestinal Intervention (IJGII)'.

The theme of this year's conference is "Together in Progress: Bridging Gaps, Building Trust, Advancing GI Intervention", and we invite internationally renowned scholars to assist you in your research and patient care. We believe this symposium will be a great platform to connect colleagues together and a valuable time to share and discuss various ideas and issues on digestive disease to leap forward in advancing human care beyond health care.

We look forward to your active participation.

Thank you.

SGI Edelweiss Scholarship

The SGI Edelweiss Scholarship has been supporting young doctors from developing countries since 2013. The name of the scholarship came from the lyrics “Small & White, Clean & Bright” of the song “Edelweiss” which is the soundtrack of the “Sound of Music”. This program has been designed to build a bright future for young doctors by gathering pure and small gestures from the heart.

We welcome you to support these young doctors by making donations. The scholarship is open to all young doctors from developing countries, and the recipients are selected by the scholarship committee. Your support will ease the financial burden of those in need so that they may participate in high-quality meetings and help promote balanced growth of our field across different regions.
